A VoIP solution you don't have to develop

Incorporate The 2N® IP Audio Kit is easily incorporated into your existing device. Thanks to IP technology you simply extend it to include audio functionality.

Simple DIN rail mounting

The $2N^{\circ}$ IP Audio Kit is suitable for mounting on a standard TS 35 DIN rail, preferably at least 14 cm long.

A wide range of connectors

Choose from a wide range of interfaces. Hook up a microphone, speakers, headphones or keypad buttons.

N® IP Audio Kit

SIP support, with no server needed

With it's SIP protocol support the intercom easily links with IP phones and PBX from other producers, without having to connect to the server.

Time profiles

This function allows you to define the time period a given telephone number or access code are valid.

Remote control

The HTTP API allows OEM intercom systems to be easilyintegrated into the master system for remote administration.

User defined sounds

There are up to 10 user slots for uploading user-defined sounds (e.g.,vocal guidance or warning messages).

Adaptive volume

The 2N® IP Audio Kit automatically adjusts speaker volume based on ambient noise level.

Power supply

2N® IP Audio Kit can be powered by PoE or from a 12 V source.
